

PABLO PEREZ

CV

Engineer in Industrial Design

Hi! I am a spanish recent graduate in Industrial Design Engineering looking for my next adventure. I admire this industry for being able to transform innovative ideas into real solutions for real people. I am 50% engineer, 30% digital designer and 20% artist, so I specially enjoy working with all types of people in multidisciplinary environments. I always stand out in the technical side of my design projects, mostly taking the role of prototyping and CAD modelling. I'm passionate about physics and maths, I play the piano and I love technology.
